

PRESS RELEASE

Stadtwerke Lemgo relies on 4cast Horizon – speed and precision for sustainable energy projects

Potsdam, 11.12.2024 – 4cast GmbH & Co. KG is pleased to welcome Stadtwerke Lemgo as a new customer. The foundation stone of this cooperation was laid at the Osnabrück wind regulators' table, where the first talks took place and finally led to a successful tender.

Stadtwerke Lemgo opted for the yield forecasting solution "4cast Horizon" in order to plan its wind projects even more efficiently. The fast delivery time was particularly convincing – a trademark of 4cast. Within just 5 to 8 business days, the standardized timeframe, the solution was delivered and made ready for use. This speed and precision ensure that Stadtwerke Lemgo can make well-founded decisions in order to implement its projects quickly and successfully.

"Our cooperation with Stadtwerke Lemgo is another example of how important fast and precise forecasting solutions are for the successful implementation of energy projects," explains Sascha Bauer, CEO of 4cast

GmbH & Co. KG. "With 4cast Horizon, we enable our customers to work more efficiently and actively shape the energy transition."

With 4cast Horizon, Stadtwerke Lemgo now has access to precise long-term yield forecasts, which not only accelerate their planning processes, but also ensure a high level of security in the implementation of their sustainable energy projects.

"The energy transition does not wait, and we want to expand our pioneering role in NRW," says Tim Rose, project manager at Stadtwerke Lemgo. "The rapid deployment and high accuracy of 4cast Horizon are crucial for us to implement our wind projects quickly and efficiently."

About Stadtwerke Lemgo GmbH

Stadtwerke Lemgo GmbH is a municipal energy service provider in East Westphalia-Lippe that provides electricity, gas, water and district heating. The municipal utilities are 100% a subsidiary of the city of Lemgo.
